

## STATEMENT OF PURPOSE

RS27696 / H0519

The purpose of this legislation is to ensure that at least one parent or guardian of an unemancipated minor child, who is under the care of a doctor and healthcare facility, is notified 48 hours prior to a doctor instituting an order to withhold life-sustaining treatment. This legislation also provides within 48 hours of notification of such an order, a parent or guardian has the right to request their unemancipated minor child to be transferred from the facility under whose care the child is admitted to another available facility or transferred home. The parent or guardian has 15 days to arrange the transfer, if it is not against existing state law, governing agency rules and regulations, hospital policy, or third-party payment contracts.

## FISCAL NOTE

According to the Department of Health and Welfare's Division of Medicaid the per utilizer per week expenditure for in-patient hospital care is \$7,458 (\$1,065 per day). Therefore, if a parent chooses to keep their child in the hospital for the entire 15-day period, hospital costs could be nearly \$16,000. Who actually pays this amount would be based on any combination of numerous factors including, the parents' health insurance and financial status and eligibility for various state and federal programs.
